

Project: *BG0249*
Current Revision: *R1M1E1*

BG0249 *Revision History:*

Date	Revision	Reason for Change	Changes Implemented
12/4/2019	R0M0E0 -> R1M1E1	1) Slot for camera did not get correctly generated in gerbers 2) Library and components not common w/ LuxonisMaster 3) BW1098FFPC production will standardize on bottom-side contact connector, for "face down" BG0249 orientation, we need a same-side contact flex.	1) Updated camera footprint, removed duplicate board cutout, fixed physical board shape in Altium, and removed unnecessary layers from project. 2) Updated all components to the new LuxonisMaster library format in order to standardize layer usage, supply chain, and data. Some caps and resistors changed footprints and MFRs to align with LuxonisMaster, but no component values were changed. Only exception is a change to the SwReg inductor to DFE252012P-1R0M-P2, which has same inductance, higher current rating, and is being used on other Luxonis boards in this application. 3) Changed flex from opposite-side Wurth 687726152002 to same-side Molex 0151660281. Molex FPC is about \$0.75 cheaper, too.

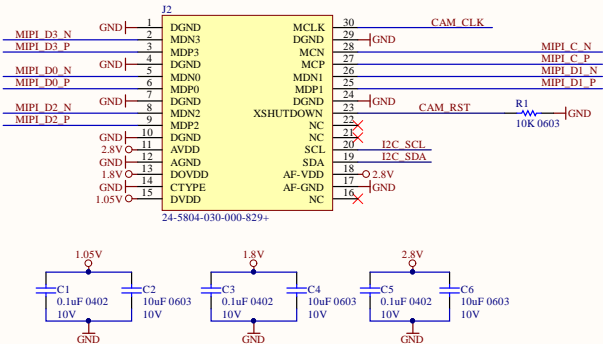

Supply Information			
Supply Name		Voltage	Max Current
Module	Sensor		
AVDD	VANA	2.8V \pm 0.1	55mA
DOVDD	VIF	1.8V \pm 0.1	2.5mA
DVDD	VDIG	1.05V \pm 0.1	446mA

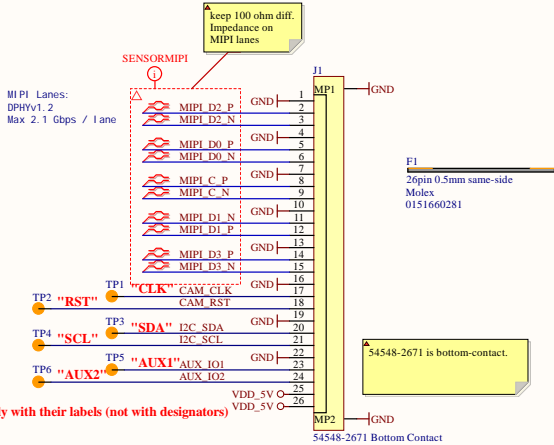

BG0249

MODULE CONNECTOR

MODULE & SENSOR INFORMATION			
MODULE	A12N02A-201	I2C Clock Rate	1000 kHz Max
SENSOR	IMX378-AAQH5-C	I2C Address (8 bits)	0x34 (Sensor) 0x18 (VCM driver) 0xA0 (EEPROM driver)
MAX RESOLUTION	4056x3040	Sensor Clock Input	6 - 27 MHz

FFC CAMERA CONNECTOR

Title BG0249			Luxonis Holding 1925 Harmony Park Drive Westminster, CO 80234 United States	
Size: Tabloid	Number: D000103	Revision: R1M1E1
